

What is gas used for in your house? Do you know where it comes from or how much it costs?

Can you name some things that we get multiple uses from in our culture? Can you name a few things which could be used but usually get thrown out?

What are some of the things that you know about which we put on our food crops to help them grow? Do you know any natural substances, any chemicals?

Can you think of any ways that you could easily tap into the solar power in your yard?

Why do you think that the Vietnamese pack 4 people onto a bike and it is common in this country for a single person to drive around in an oversized SUV? Do you ever make fuel saving decisions?

Are there places you could just ride a bike instead of getting into the car? Write a little bit about your relationship to bikes.

Wouldn't it be cool if you could get valuable products out of your pets? Do you think that you could ever eat an animal that you raised? Do you eat animals that other people raise?

Did you know that rotting garbage in landfills also gives off methane. Have you ever seen a landfill, from up close or from the road? If you look closely you can see that there are pipes coming up from the ground which let methane rise from the depths.

Some landfills actually catch this gas and sell it to consumers.
